Be Unique

The Brand Advantage 2026

Unique gifts for effective brand recognition

Mindful branded promotions

Explore a world of new products, smart solutions, creative ideas, and flexible printing options - all designed to help your brand stand out. As the demand for recycling and reuse continues to grow, we are proud to play an active role in the transition to a circular economy. We continually reassess our materials, products, and services to ensure they align with sustainable and responsible practices. The Brand Advantage 2026 features practical, everyday items that leave a lasting impression.

The pictures of the items reproduced in our catalogue are not contractual. We reserve the right to change without notice the product and packaging specifications or colours of any item mentioned in this catalogue.

Environmental, Social & Governance

Planet

Sustainable solutions

Committed to reducing environmental impact by enhancing raw materials, optimizing packaging, and partnering with suppliers to minimize their footprint.

People

Social responsibility

The Brand Advantage 2026 collection is built on well-being, inclusion, health, and safety. Through risk assessments, community initiatives, and active stakeholder dialogue, we foster social responsibility — creating positive, lasting impact for everyone involved.

Promoter

Championing traceability

Sustainability guides every step of our journey, from sourcing and production to logistics. We hold ourselves accountable across the entire supply chain and continually push boundaries to stay ahead of legislation, inspire progress, and lead meaningful change.

Change

Creating awareness

By sharing knowledge and creating communication that sparks action, we are leading the movement towards a more sustainable industry. Our partnerships and educational initiatives empower collaboration, inspire innovation, and motivate lasting change for a better future.

The Brand Advantage 2026

Printing Techniques

Having your logo printed with the widest range of printing techniques has never been so easy. These are the main techniques used to print your logo.

Digital printing 360

Compared to round screen, it's possible to print full colour images. UV ink technology does not emit volatile organic compounds to the atmosphere. When combined with white underprint - possibilities are limitless on transparent objects.

Laser engraving 360

Next level for inkless decoration, now possible on cylindrical products. Compared to conventional engraving, area is limited by circumference of cylindrical object. Can be used on mugs with handles. Best results on natural materials.

Sublimation

Printed with special inks on transfer paper, transferred to material using high temperatures. Photographic quality of printed images, vivid colours and accuracy of small details. Requires white background and polyester material/coating.

Doming

Digitally printed full colour label on self-adhesive polymer foil, covered by a thick layer of transparent epoxy resin, which both protects the image, as well as giving a premium, glossy look and finish.

Digital Label

A flexible way to brand various products in almost any shape, self-adhesive polymer foil will fit in positions not accessible by other print techniques.

Digital Printing

UV flat bed inkjet technology allows you to print vivid full colour images on various materials - artificial and natural. Compared to Digital printing 360 - technique requires flat, rigid products. White underprint possible.

Digital inlay

Xerographic full colour print on paper is a perfect way to convey message to Your customer. This technique is best for text and images, can be used: as a manual or "Thank You" notes or items where this is the only option available.

Button printing

Best way to stand out from the crowd with this full colour button. Printed using xerographic technology on paper, assembled with glossy finish to give premium look.

Digital Transfer

Digitally printed image on carrier foil with heat activated glue, applied in high temperature and pressure. Features full colour photographic quality and sharp details. Gives a premium look and feel, especially on textile materials.

Screen transfer

Conventional way of indirect printing using screen print. Can be applied on materials and places, where direct screen printing is not possible, in addition up to 8 different colours can be used on one image. Special colours available.

Ceramic transfer

Technique of printing image using special inks on paper, transferred to the item using water film and heated in extreme temperatures to assure durability. Special colours available. Recommended for ceramic materials.

Screen printing

Image exposed on a screen mesh, through which ink is squeezed to the marked surface. Main advantage is large printing area on flat surfaces, almost any material, with possibility to use special colours. First choice for textiles.

Pad printing

Image transferred to surface from engraved cliché by silicone tampon. Most versatile marking technique on almost any rigid shape and material. Maximum of 4 colours. Special colours available. Cost efficient technique on small items.

Round screen printing

Evolution of screen printing allowing print on to cylindrical and conical products. Compared to pad printing, technique allows for a bigger printing area. Can be used on mugs with handles. Maximum of 1 colour. Special colours available.

Debossing

The engraved metal stamp is heated and is pressed against the material creating a permanent depression in the shape of the customer's artwork. Best results can be achieved on leather, PU, cardboard materials, like notebooks, organizers.

Embroidery

Computerized stitching allows complex artworks being sewn in the material, creating premium and permanent marking. Maximum of 8 colours in one image. Possible on textile materials like bags, t-shirts, jackets, etc, as well as caps.

Laser engraving

Marking is permanent, by selectively removing microscopic layers of material, thus creating visible marks on the surface. Colour varies depending on processed material. Best results on natural materials (metals, wood, bamboo, etc.).
